

# ELECTRONIC LOCK KITS SYSTEM 1000 AND SYSTEM 1500

## KEY FEATURES

- Enhances security over standard mechanical or combination locks
- Eliminates the need for keys and allows quick lock reprogramming if there is a security concern
- Multiple access codes allow assignment of administrator and user only rights
- Battery power allows deployment on any cabinet
- Long battery life minimizes maintenance and replacement
- External battery override allows access if batteries fail
- Kitted to match specific CPI Cabinets and door styles for easy selection and quick installation

## APPLICATIONS

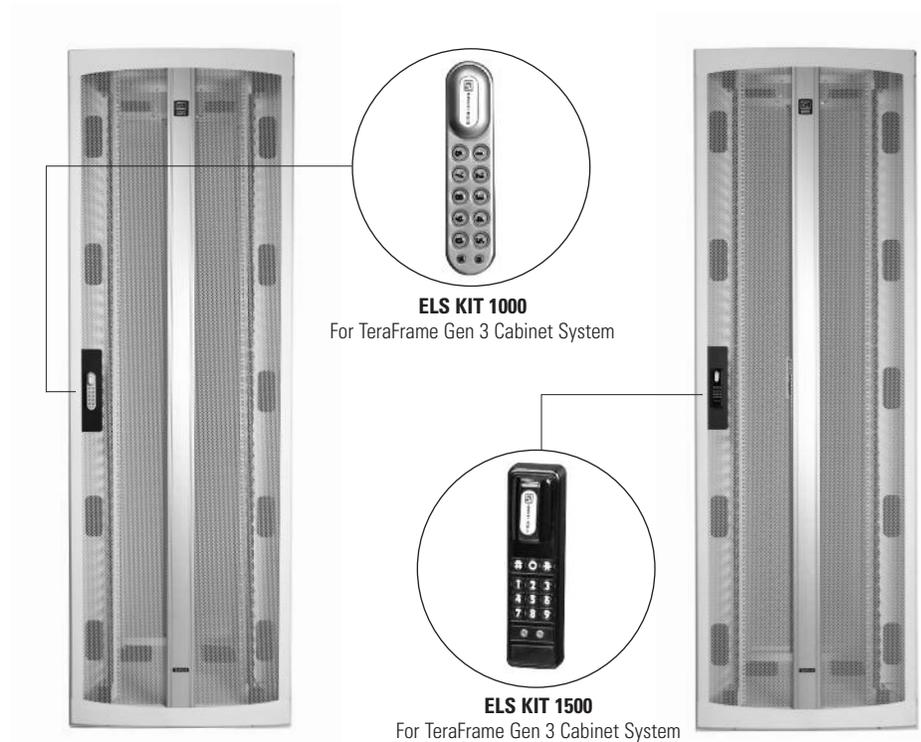

- Use on equipment cabinets to enhance security by replacing keyed or combination mechanical locks

## USE WITH

- F-Series TeraFrame® Gen 3 Cabinet System
- GF-Series GlobalFrame® Gen 2 Cabinet System
- ThinLine II Wall-Mount Cabinet

## RELATED ACCESSORIES

- Remote Infrastructure Management (RIM-600) System

**ELS KIT 1000**  
For TeraFrame Gen 3 Cabinet System

**ELS KIT 1500**  
For TeraFrame Gen 3 Cabinet System

Electronic Lock Kits are replacement locks for CPI's F-Series TeraFrame® Gen 3 Cabinet System, GF-Series GlobalFrame® Gen 2 Cabinet System and ThinLine II Wall-Mount Cabinet. Each Electronic Lock Kit includes a standalone electronic keypad lock and hardware for mounting the lock to a specific type of cabinet and door.

Electronic Lock Kits provide enhanced security for cabinets as compared to standard keyed mechanical locks by eliminating the need for keys and by allowing access codes to be changed quickly without replacing or rekeying the lock. Each lock can be programmed with multiple access codes and supports three levels of administrative rights. This allows you to assign administrative or access only rights to different staff members. Additionally, in a multi-cabinet site, you can assign a master code to open all cabinets and different sub-master or user codes to open smaller groups of cabinets to match specific customer or staff requirements.

Electronic Lock Kits are available in two models: System 1000 and System 1500. Both models are battery powered, and include a low battery warning LED and external battery override in case the battery fails. System 1000 is a basic lock that supports three access codes and approximately 15,000 open cycles with a new set of batteries. System 1500 is an enhanced solution that supports twenty-two access codes and approximately 50,000 open cycles with a new set of batteries. Additionally, System 1500 has an optional Dual Code mode that requires two codes to be entered to open the lock and audible keys to indicate lock activity.

See reverse for product selection. Contact CPI Technical Support (800-834-4969) for configuration assistance.

SPECIFICATIONS

**Electronic Lock Kit, System 1000**

- Standalone electronic keypad lock (not networked, no audit trail)
- Three user levels and three programmable access codes:
  - 1 Master code (8-digit) – full administrative rights
  - 1 Sub-Master code (8-digit) – set/delete user code
  - 1 User code (4-digit)
- Approximately 15,000 openings per battery change
- Powered by 2 x 1.5 VDC AAA batteries
- Low Battery warning LED
- External battery override with 9 VDC battery
- Includes: Lock handle, door mounting plate (if required) and mounting hardware
- Material: zinc-alloy handle, steel mounting plate
- Finish: Silver-colored handle, black mounting plate

**Electronic Lock Kit, System 1500**

- Standalone electronic keypad lock (not networked, no audit trail)
- Three user levels and twenty-two programmable access codes:
  - 1 Master code (8-digit) – full administrative rights
  - 1 Sub-Master code (8-digit) – set/delete user code
  - 20 User codes (4-digit)
- Approximately 50,000 openings per battery change
- Powered by 2 x 3 VDC CR2450 coin batteries
- Audible keypad notifies when keys are depressed or sound can be disabled
- Dual Code mode requires two codes to open
- Low Battery warning LED
- External battery override with 9 VDC battery
- Includes: Lock handle, door mounting plate (if required) and mounting hardware
- Material: zinc-alloy handle, steel mounting plate
- Finish: Black handle and mounting plate

ORDERING INFORMATION

Electronic Lock Kit, System 1000 For F-Series TeraFrame Gen 3 Cabinet System					
Part Number – Door/Style			Latch Type	Door Height (U)	Shipping Weight lb (kg)
Front Door Single, Perf.	Rear Door, Single, Solid	Rear Door, Double, Perf.			
39222-C00	39223-C00	N/A	Single-Point	All	3 (1.4)
