

# Installation Instructions

## GLOBALFRAME BRUSH KIT

### Safety Information

**CAUTION:** Knockout panel may cause injury if it is dropped during removal from the top panel.

### Intended Use

Install only in a restricted service environment, such as a data center. Use indoors only, in environmentally controlled areas; do not use outdoors, in harsh environments or in air-handling spaces.

### Tools Required

Straight Blade Screw Driver

### Included Parts

4 Brush Assemblies ( 2 pair)

### Assembly Sequence

1. Knockout Panel Removal:
  - a. Determine which knockout will be removed from the Top Panel.
  - b. Using a flat bladed screwdriver, insert the blade into the rectangular openings around the edge of the knockout panel. Force the knockout panel upward with a prying action until it breaks loose; **DO NOT PRY THE PANEL DOWNWARD AS THIS COULD CAUSE THE PANEL TO FALL OUT. NEVER REMOVE THE PANEL FROM INSIDE OF THE CABINET.**
  - c. Repeat step "b" for each screwdriver opening in the following order:
    - i. Do all openings along one side.
    - ii. Do all openings on the opposite side. When the last opening is broken, lift the panel upward and grasp it with your hands.
    - iii. Continue to raise the panel, it will hinge on the edge that is still attached, until it breaks loose.

## GLOBALFRAME BRUSH KIT

2. Brush Assembly Installation:
  - a. Position one brush assembly with its guide pins onto one half of the knockout opening using the alignment holes.
  - b. Push brush assembly onto opening until it snaps into place.
  - c. Repeat steps 2a and 2b to cover entire knockout.
3. Repeat Steps 1 and 2 for second opening if desired.
4. To remove brush assembly:
  - a. Disengage the two small snap hooks on opposite ends of brush assembly.
  - b. Disengage the two large snap hooks next to the guide pins.
  - c. Slide the brush assembly off.
  - d. Repeat for other side brush assembly.
