

Pedestal Clamp with Bonding Connector

Support bonding conductors from round or square raised floor pedestals using the Pedestal Clamp with Bonding Connector. The connector provides a bonding connection for the pedestal and supports up to four bonding conductors (wires) from the pedestal. Use to create a signal reference grid under the raised access floor using #6 AWG or 2/0 bare round conductor. Select the Pedestal Clamp with Bonding Connector to match the style and size of the pedestal and size of the conductor. See the order table.

- Use Cross Connectors to create signal reference grid intersections; support up to (4) conductors, 2 per side, size #6 AWG or 2/0
- Use Straight Connectors to support the signal reference grid in-between intersections; support 1 or 2 conductors on one side of the pedestal only, size #6 AWG or 2/0
- Manufactured from electrotin plated copper or bronze (P/N 40169-003) with stainless steel installation hardware
- PNs 40169-001 and 40169-002 are UL® Listed, File E236184, Category KDER (US), KDER7 (Canada) - Bonding and Grounding Equipment

Cross Connector

Straight Connector

ORDERING INFORMATION

Part Number	Description	Pedestal Style, Diameter in (mm)	Number and Size of Connectors	Shipping Weight lb (kg)
40169-001	Pedestal Clamp, Cross Connector	Square, 1-1/8 (28) Outside Diameter	(2) #6 AWG per side	2 (0.9)
40169-002	Pedestal Clamp, Cross Connector	Round, 1-1/8 (28) to 1-3/4 (44) Outside Diameter	(1) #6 AWG and (1) 2/0 per side	2 (0.9)
40169-003	Pedestal Clamp, Straight Connector	Square or Round, 1-1/8 (28) Outside Diameter	(2) #6 AWG or (2) 2/0 one side only	2 (0.9)

Note: P/N 40169-003 can support two conductors that are the same size; conductors can be #6 AWG through 2/0.
